## C I R C U L A R.

---

The ensuing COURSE OF LECTURES will be commenced on Monday, the first of November next, by which time the Faculty earnestly desire to see the whole class assembled. The Lectures will continue until the following March. Preliminary Lectures will be delivered at the College during the month of October, as also Clinical Lectures at the Hospitals and Dispensary.

These preliminary lectures are free of charge to all students, and those who can will do well to attend them, especially as subjects are treated of not ordinarily embraced in the regular course.

The Anatomical rooms will also be opened on the fourth day of October, for the benefit of those students who may arrive before the commencement of the regular lectures. They will be under the superintendence and direction of the Professor and Demonstrator of Anatomy, one of whom will always be present to afford every information and assistance to those engaged in dissections.

Among the Institutions which afford the Faculty ample opportunities for Clinical Instruction, Surgical Operations and Post-Mortem Examinations, may be mentioned the following:

### THE ST. LOUIS HOSPITAL.

This Institution is situated within three squares of the College building, and, on account of its central and convenient location, is the receptacle of most of the cases of severe recent injury. It is under the exclusive control of the Faculty during the entire year. An hour is spent EVERY DAY within its wards by the Professor of Clinical Medicine, the class being subdivided, so that every student may have an opportunity of seeing and examining cases for himself. Besides these daily morning visits, the entire forenoons of Wednesdays and Saturdays are devoted exclusively to Clinical exercises in both Medicine and Surgery, by the whole class, either

in this or in some one of the Hospitals. Thus the page of disease is continually exhibited to the student, to be read by him in all its phases; Semiology and Therapeutics go hand in hand, and Pathology and the action of Medicines are taught by practical, living illustrations.

An extensive addition has been erected, which makes the building twice its former size; and a still further addition is now in progress of erection through the liberal bequest of the late John Thornton, Esq.

#### CITY HOSPITAL.

This large and magnificent Hospital, which two years ago was consumed by fire, has been re-erected, and is now filled with patients. In its re-arrangement care has been taken to introduce all the modern improvements, which render it even more convenient and available for Hospital and Clinical purposes than it was before. During the whole term of lectures, some one of the Faculty will be in attendance upon either the Medical or Surgical department. Clinical lectures are here delivered by the Professor of Clinical Medicine or Surgery, during the preliminary as well as the regular course.

#### UNITED STATES MARINE HOSPITAL.

This charity, erected by the General Government, is situated in South Saint Louis, and is devoted to the reception of sick and disabled boatmen. As St. Louis is already the third city in the Union in steamboat tonnage, it will be readily perceived how large a number of cases find their way into this excellent charity. It is under the care of Dr. McPHEETERS, who holds the post of Physician and Surgeon to the Institution. Here, as well as in the two preceding Hospitals, students are admitted free of charge.

#### THE ST. LOUIS LYING-IN HOSPITAL.

A large and appropriate structure has been erected on the southeast corner of Tenth and O'Fallon streets. The Physician in charge is Dr. L. CHARLES BOISLINIERE, who will be glad to extend its practical benefits to all students, upon the payment of a small fee. Professor Pallen is the Consulting Physician.

#### THE O'FALLON CLINIC AND DISPENSARY.

This establishment occupies a building adjoining the Lecture Room of the College. Here, through the enlarged benevolence

and liberality of its founder, Col. JOHN O'FALLON, the poor receive medical and surgical assistance free of charge; whilst the Faculty have an important auxiliary to their already great facilities for Clinical instruction. Although presenting every variety of Medical and Surgical affection, the student is yet made more especially familiar with those diseases which he is most likely to meet with in the outset of his professional career. The average number of patients prescribed for and operated on during the year is over four thousand.

#### ANATOMICAL MATERIAL.

In St. Louis, anatomical material is both *cheap* and *abundant*. It will be the student's own fault if he fail to acquire a perfect knowledge of Practical Anatomy. Here are always subjects enough and to spare.

#### MUSEUM.

Although of comparatively recent date, the Museum will compare favorably with those of our oldest Institutions. It embraces the usual objects of such a collection, most of which are from the celebrated establishments of Guy Ainé and of Thibert, of Paris. Large and valuable additions, in the way of illustrations of the diseases of the skin, in wax, morbid osteological specimens, etc., etc., have been made since the last announcement; and no pains or expense will be spared to render it complete.

Besides the Museum, more strictly appertaining to the elucidation of Medicine proper, another has been added, which is devoted to the collateral sciences of Comparative Anatomy, Natural History, Geology, Mineralogy, etc. Already presenting numerous specimens of considerable value and beauty, it will require but a very short time to render this collection still more valuable and attractive. The student may here pass many hours both pleasantly and profitably.

#### REQUISITES FOR THE DEGREE OF DOCTOR OF MEDICINE.

1. That the candidate be twenty-one years of age, of good moral character, and have been engaged in the study of Medicine for three years (courses of lectures included).
2. That he shall have attended two full courses of lectures in this Institution. Attendance on a regular course in some respectable and generally accredited medical school, or four years of reputable practice, will however be considered as equivalent to one of the

courses above specified. The Dissecting Ticket must also have been taken at least one session in this or some other school. He must also have followed the practice of a Hospital.

3. That he shall undergo a satisfactory examination on all the branches taught in this College, and write an acceptable Thesis, either in the English, Latin, French, or German language, on some subject connected with Medicine.

4. That he notify the Dean, in writing, of his intention to become a candidate by the first of February, and deliver to him his Thesis, accompanied by the graduating fee; which shall be returned, along with the Thesis, in case of withdrawal or rejection.

Graduates of other respectable schools are admitted to the Lectures on the payment of the Matriculating fee only.

Students will be expected to exhibit their tickets to the Janitor, after the first two weeks of the session.

The fees for the whole course (paid in advance) amount to \$105. The Matriculating Ticket (paid but once) is \$5; that of the Demonstrator, \$10. The Hospital Tickets are gratuitous, and the Graduating Fee is \$20.

Boarding, including lights and fuel, can be obtained as usual, in respectable private families, at convenient distance from the College, at as reasonable rates as in other large cities. All students or others, desirous of obtaining further information, can either address the Dean, or, on arriving in this city, call upon him at his office, south-west corner of Tenth and Locust streets; or inquire of the Curator at the College, on the north-east corner of Seventh and Myrtle streets.

CHARLES A. POPE, M.D., DEAN.

---

The ensuing COURSE OF LECTURES will be commenced on Monday, the first of November next, by which time the Faculty earnestly desire to see the whole class assembled. The Lectures will continue until the following March. Preliminary Lectures will be delivered at the College during the month of October, as also Clinical Lectures at the Hospitals and Dispensary.

These preliminary lectures are free of charge to all students, and those who can will do well to attend them, especially as subjects are treated of not ordinarily embraced in the regular course.

The Anatomical rooms will also be opened on the fourth day of October, for the benefit of those students who may arrive before the commencement of the regular lectures. They will be under the superintendence and direction of the Professor and Demonstrator of Anatomy, one of whom will always be present to afford every information and assistance to those engaged in dissections.

Among the Institutions which afford the Faculty ample opportunities for Clinical Instruction, Surgical Operations and Post-Mortem Examinations, may be mentioned the following:

### THE ST. LOUIS HOSPITAL.

This Institution is situated within three squares of the College building, and, on account of its central and convenient location, is the receptacle of most of the cases of severe recent injury. It is under the exclusive control of the Faculty during the entire year. An hour is spent EVERY DAY within its wards by the Professor of Clinical Medicine, the class being subdivided, so that every student may have an opportunity of seeing and examining cases for himself. Besides these daily morning visits, the entire forenoons of Wednesdays and Saturdays are devoted exclusively to Clinical exercises in both Medicine and Surgery, by the whole class, either

in this or in some one of the Hospitals. Thus the page of disease is continually exhibited to the student, to be read by him in all its phases; Semiology and Therapeutics go hand in hand, and Pathology and the action of Medicines are taught by practical, living illustrations.

An extensive addition has been erected, which makes the building twice its former size; and a still further addition is now in progress of erection through the liberal bequest of the late John Thornton, Esq.

#### CITY HOSPITAL.

This large and magnificent Hospital, which two years ago was consumed by fire, has been re-erected, and is now filled with patients. In its re-arrangement care has been taken to introduce all the modern improvements, which render it even more convenient and available for Hospital and Clinical purposes than it was before. During the whole term of lectures, some one of the Faculty will be in attendance upon either the Medical or Surgical department. Clinical lectures are here delivered by the Professor of Clinical Medicine or Surgery, during the preliminary as well as the regular course.

#### UNITED STATES MARINE HOSPITAL.

This charity, erected by the General Government, is situated in South Saint Louis, and is devoted to the reception of sick and disabled boatmen. As St. Louis is already the third city in the Union in steamboat tonnage, it will be readily perceived how large a number of cases find their way into this excellent charity. It is under the care of Dr. McPHEETERS, who holds the post of Physician and Surgeon to the Institution. Here, as well as in the two preceding Hospitals, students are admitted free of charge.

#### THE ST. LOUIS LYING-IN HOSPITAL.

A large and appropriate structure has been erected on the southeast corner of Tenth and O'Fallon streets. The Physician in charge is Dr. L. CHARLES BOISLINIERE, who will be glad to extend its practical benefits to all students, upon the payment of a small fee. Professor Pallen is the Consulting Physician.

#### THE O'FALLON CLINIC AND DISPENSARY.

This establishment occupies a building adjoining the Lecture Room of the College. Here, through the enlarged benevolence

and liberality of its founder, Col. JOHN O'FALLON, the poor receive medical and surgical assistance free of charge; whilst the Faculty have an important auxiliary to their already great facilities for Clinical instruction. Although presenting every variety of Medical and Surgical affection, the student is yet made more especially familiar with those diseases which he is most likely to meet with in the outset of his professional career. The average number of patients prescribed for and operated on during the year is over four thousand.

#### ANATOMICAL MATERIAL.

In St. Louis, anatomical material is both *cheap* and *abundant*. It will be the student's own fault if he fail to acquire a perfect knowledge of Practical Anatomy. Here are always subjects enough and to spare.

#### MUSEUM.

Although of comparatively recent date, the Museum will compare favorably with those of our oldest Institutions. It embraces the usual objects of such a collection, most of which are from the celebrated establishments of Guy Ainé and of Thibert, of Paris. Large and valuable additions, in the way of illustrations of the diseases of the skin, in wax, morbid osteological specimens, etc., etc., have been made since the last announcement; and no pains or expense will be spared to render it complete.

Besides the Museum, more strictly appertaining to the elucidation of Medicine proper, another has been added, which is devoted to the collateral sciences of Comparative Anatomy, Natural History, Geology, Mineralogy, etc. Already presenting numerous specimens of considerable value and beauty, it will require but a very short time to render this collection still more valuable and attractive. The student may here pass many hours both pleasantly and profitably.

#### REQUISITES FOR THE DEGREE OF DOCTOR OF MEDICINE.

1. That the candidate be twenty-one years of age, of good moral character, and have been engaged in the study of Medicine for three years (courses of lectures included).
2. That he shall have attended two full courses of lectures in this Institution. Attendance on a regular course in some respectable and generally accredited medical school, or four years of reputable practice, will however be considered as equivalent to one of the

courses above specified. The Dissecting Ticket must also have been taken at least one session in this or some other school. He must also have followed the practice of a Hospital.

3. That he shall undergo a satisfactory examination on all the branches taught in this College, and write an acceptable Thesis, either in the English, Latin, French, or German language, on some subject connected with Medicine.

4. That he notify the Dean, in writing, of his intention to become a candidate by the first of February, and deliver to him his Thesis, accompanied by the graduating fee; which shall be returned, along with the Thesis, in case of withdrawal or rejection.

Graduates of other respectable schools are admitted to the Lectures on the payment of the Matriculating fee only.

Students will be expected to exhibit their tickets to the Janitor, after the first two weeks of the session.

The fees for the whole course (paid in advance) amount to \$105. The Matriculating Ticket (paid but once) is \$5; that of the Demonstrator, \$10. The Hospital Tickets are gratuitous, and the Graduating Fee is \$20.

Boarding, including lights and fuel, can be obtained as usual, in respectable private families, at convenient distance from the College, at as reasonable rates as in other large cities. All students or others, desirous of obtaining further information, can either address the Dean, or, on arriving in this city, call upon him at his office, south-west corner of Tenth and Locust streets; or inquire of the Curator at the College, on the north-east corner of Seventh and Myrtle streets.

CHARLES A. POPE, M.D., DEAN.
